Computer Network and Internet Acceptable Use Policy

This document constitutes the Sciotoville Community Schools' ("District") Computer Network and Internet Acceptable Use Policy ("Policy"), and applies to all persons who use or otherwise access the Network and/or Internet, whether with District or personal equipment or whether on-site or by wireless or other remote access ("Users").

- 1. Definitions.** For purposes of this Policy, the term "Network" shall mean the District's group of interconnected via cable and/or wireless computers and peripherals, all other District software and hardware resources including all Web-based material and all Web hosting, all data, databases and storage media, all standalone, portable and/or borrowed devices, and all provided connectivity between and among Users and from Users to the global Internet, including any and all Instructional Technology Centers or other third-parties providing connectivity and other services, and any and all identifiers, accounts, rights, permissions, and current or future hardware, software, or connectivity owned or managed by the District to which access is provided to Users. Individual system computers are considered to be part of the "Network" and are subject to the terms of this Policy even when the User is not attempting to connect to another computer or to the Internet. The term "Use" of the Network shall mean any and all actions of a User which create traffic on the Network, including traces or remnants of traffic that pass through District equipment, wiring, wireless networks, or storage devices regardless of any other factor such as passage of time, user deletion, transit of the Network without storage or origination and/or storage on personal equipment.
- 2. Purpose and Use:** The School District is providing Users access to its Network to support and enhance the educational experience of students and to facilitate work duties of employees. Access to system computers and the Network is a privilege, not a right. The District reserves the right to withdraw access at any time for any lawful reason. The District reserves the right to determine what constitutes an improper use of system computers or the Network, and is not limited by the examples of misuse given in this Policy. Users may violate this Policy by evading or circumventing the provisions of the Policy, alone or with others. If Users have any doubt about their obligations under this Policy, including whether a certain activity is permitted, they must consult with the technology coordinator to be informed whether or not a use is appropriate.
- 3. Users Bound by Policy in Accepting Access:** The User consents to the terms of this Policy whenever he or she accesses the Network. Users of the Network are bound to the terms of this Policy regardless of whether or not a copy was received and/or signed for by the User.
- 4. Personal Responsibility:** Users are responsible for their behavior on the Network just as they are in a classroom, school hallway, or other School District property. Each User is responsible for reading and abiding by this Policy and any and all future amendments, which will be made readily available in both electronic and printed form. Anonymous use is not permitted and access (including passwords) may not be shared or transferred. If a User suspects that a password is not secure, he or she must inform his teacher and the technology coordinator immediately. Any improper use of your account, even if you are not the User, is your responsibility.

- 5. Reporting Misuse of the Network:** Users must report any misuse of the Network to the technology coordinator. “Misuse” means any apparent violation of this Policy or other use which has the intent or effect of harming another person or another person’s property.
- 6. Violating Policy with Personal Equipment:** The use of personal equipment and/or personal Internet access to violate this Policy or to assist another to violate the Policy is prohibited. Exceeding permission (such as abusing access to unfiltered Internet connectivity) is a violation of this Policy. Using private equipment to divert student time and/or attention from scheduled educational activities, or to divert paid work time from its proper purpose, is always strictly prohibited. Personal equipment used to violate this Policy on school property is subject to search related to the violation and seizure for a period of up to thirty (30) days.
- 7. Discipline for Violation of Policy:** Violations of each of the provisions of this Policy are considered violations of the Student Code of Conduct (or if an employee, of the contract of employment), and each violation is a separate infraction. Violations may result in disciplinary action for students up to and including suspension or expulsion and/or referral to law enforcement, or up to termination and referral to law enforcement for employees. The District reserves the right to seek reimbursement of expenses and/or damages arising from violations of these policies.
- 8. Waiver of Privacy:** By accepting Network access, Users waive any and all rights of privacy in connection with their communications over the Network or communications achieved through the use of District equipment or software. Electronic mail (e-mail) and other forms of electronic communication (including instant messaging of all forms and SMS messages originating from email) are not guaranteed to be private. The District owns all data in the system. Systems managers have access to all messages for purposes of monitoring system functions, maintaining system efficiency, and enforcing computer/network use policies and regulations, District policies, and state and federal laws. Illegal activities or suspected illegal activities may be reported to the authorities.
- 9. Confidentiality and Student Information:** Users are responsible for maintaining security of student information and other personally identifiable data that they access, even if they access such data accidentally or without permission, and for upholding FERPA (20 U.S.C. §1232g), the student confidentiality law (Ohio Revised Code Section 3319.321), the Ohio Privacy Act (Chapter 1347 of the Ohio Revised Code), and any other applicable privacy policies and regulations. Users are responsible whether such data is downloaded from the Network to their computer screen, transmitted by e-mail, stored on a flash drive, portable device or laptop, copied by handwriting or by any or all other devices, forms of storage or methods. Negligence with respect to protecting the confidentiality of such data will be considered a violation of this Policy whether or not such negligence results in identity theft or other harm.
- 10. District-Owned Equipment:** Desktop computers, laptops, portable devices, and other equipment belonging to the District are your responsibility. Any misuse, failure, damage or loss involving such equipment must be reported to the technology coordinator. Periodic maintenance on laptops and other hardware is required. It is your responsibility to make such equipment timely available for maintenance at the request of the technology coordinator. You may be held financially responsible for the expense of any equipment repair or replacement.

12. Specific Limits on Communication Over the District Network:

- ***Expressing Opinion:*** The Network has been created at public expense and exists for purposes relating to education and administration. It does not exist to serve as a personal blog for the expression of opinions or as a public forum of any kind. It is not the intention of the District to allow the public, staff, or students to use the Network, including the web hosting or linking ability, for purposes of expressions of private opinions, or to support private or public causes or external organizations.
- ***Personal E-mail:*** Limited personal use of District e-mail by employees to communicate with family, friends, and colleagues who are willing recipients is permitted as a personal convenience, but must not impact paid work time and is subject to all of the provisions of this Policy. Violations will be determined in the sole discretion of the Superintendent

Users asked to legally verify or electronically sign documents should report the situation to the superintendent.

13. System Security and Integrity: The District reserves the right to suspend operations of the Network, in whole or in part, at any time for reasons of maintaining data security and integrity or any other lawful reason. The District reserves the right to block or filter any web sites, e-mail addresses, servers or Internet domains which it, in its sole judgment, has determined to present a risk of exposing students or employees to sexually explicit or otherwise inappropriate content, or which exposes the system to undue risk of compromise from the standpoint of security or functionality.

14. No Warranties Created: By accepting access to the Network, you understand and agree that the School District, any involved Information Technology Centers, and any third-party vendors make no warranties of any kind, either express or implied, in connection with provision of access to or the use of the Network. They shall not be responsible for any claims, losses, damages or costs (including attorneys' fees) of any kind suffered, directly or indirectly, by any student or employee arising out of that User's use of and/or inability to use the Network. 16. On August 21, 2011, the Federal Communication Commission released an amendment to the Children Internet Protection Act (CIPA) which includes an E-Rate provision of the Protecting Children in the 21st Century Act of 2008. The FCC order (FCC 11-125) implements the "educating" requirements of the Protecting Children Act effective FY 2012, meaning any school or school district applying for E-Rate discounts MUST provide Internet Safety Policies that include "monitoring the online activities of minors and must provide for educating minors about appropriate online behavior, including interacting with other individuals on social networking websites and cyber bullying awareness and response."

We will continue to monitor and filter our internet content with our local filtering appliance, and pass our local filtering through our regional ITC (SCOCA).

The Sciotoville Community Schools have adopted a curriculum to address internet safety and bullying. Our curriculum will use Internet resources as well as other sources that will best meet the current and future needs of our students and staff. The curriculum will help our educators empower their students and the school community to be safe, responsible, and savvy as they navigate the digital world.

Web Sites: Web sites created through the Network and/or linked with the School District's official web site must relate specifically to District-sanctioned activities, programs or events. Web sites created using the Network or the School District's equipment, or web sites created as part of a classroom or club assignment or activity are the sole and exclusive property of the School District in perpetuity without any ownership rights existing in the page creator(s). The School District reserves the right to require that all material and/or links with other sites found to be objectionable be altered or removed for any reason or for no reason, in the sole judgment of technology coordinator. The School District does not intend to open web pages for the expression of opinion, and specifically does not intend for its web pages to be a public forum or limited public forum for students, staff, or citizens. Web pages exist solely in support of the School District functions and mission as determined by the Board.
